

Manufacturing in Plastics: An Illustrated Guide

SHORE UP YOUR BOAT SALES WITH PROTECTIVE TAPE

After navigating some choppy waters, it looks like smooth sailing for boat sales in the United States. U.S. manufacturers sold 250,000 brand-new boats in 2016, and things are still looking up in 2017.

Keep your operations afloat by protecting the boats you build with ProtectRite film and paper protective tapes from ABI Tape:

- 6917 Marine:** This 17 mil heavy-duty paper coated with a proprietary solvent rubber adhesive system is designed to stick to a variety of high traffic gelcoat surfaces to prevent damage and end-of-production repairs. 6917 is designed to adhere to gelcoat floor surfaces and not require additional taping to prevent edge lift.
- 8510 Marine:** Looking to protect aluminum railings and other metal, plastic and painted surfaces during the production process? 8510's UV performance allows for outdoor protection of these critical surfaces for up to six months.
- 6882 Marine:** This 3 mil protective paper is designed as a medium-duty protection tape for a variety of interior cabin surfaces. Other applications for 6882 include low traffic areas on boat decks and textured gunwales.
- 6560 Marine:** Worried about scuffing a new boat's shiny exterior gelcoat during the manufacturing process? Trust 6560 to prevent accidental abrasions and scratches throughout the manufacturing process, eliminating end-of-production repairs.

This year, give your seafaring customers the boats of their dreams with high-performance, high-endurance protective marine tape from ABI Tape.
